"BLOOD IS THICKER THAN WATER"

Without good red blood a man has a weak heart and poor nerves. Thinness of the blood, or anemia, is common in young folks as well as old. It is especially the case with those who work in ill ventilated factories—or those who are shut up indoors in winter time with a coal stove burning up the oxygen or emitting carbonic (poison) gas. This blood, or blood which lacks the red blood corpuscles, in anemic people may have been caused by lack of good fresh air, or by lack of food, or by poor digestion or dyspepsia. Sometimes people suffer intense pain over the heart which is not heart disease at all, but caused by indigestion. Whatever the cause, there's just one remedy that you can turn to—knowing that it has given satisfaction for over 40 years.
